

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : William B. Kerfoot
Continuation of :
Serial No. : 08/921,763
Filed : August 26, 1997
Title : GAS-GAS-WATER TREATMENT SYSTEM FOR GROUNDWATER AND
SOIL REMEDIATION

Art Unit : Unknown
Examiner : Unknown

Commissioner for Patents
Washington, D.C. 20231

PRELIMINARY AMENDMENT

Prior to examination, please amend the application as follows:

In the specification:

Please add before the first line:

--This application is a continuation application of application Serial No. 08/921,763 filed on August 26, 1997 entitled Microporous Diffusion Apparatus (allowed), which was a continuation of application Serial No. 08/756,273 entitled Microporous Diffusion Apparatus US Patent 5,855,775, which was a continuation-in-part of application Serial No. 08/638,017 filed on April 25, 1996 entitled Groundwater and Soil Remediation with Microporous Diffusion Methods and Apparatuses, (abandoned) which was a continuation-in-part of application Serial No. 29/038,499 filed on May 5, 1995 entitled Bubblersparge Unit for Ground Water Treatment (abandoned).--

CERTIFICATE OF MAILING BY EXPRESS MAIL

Express Mail Label No. EL 485518562US

I hereby certify under 37 CFR §1.10 that this correspondence is being deposited with the United States Postal Service as Express Mail Post Office to Addressee with sufficient postage on the date indicated below and is addressed to the Commissioner for Patents, Washington, D.C. 20231.

In the claims:

Cancel claims 1-12

Add claim 13 as follows:

27. (Amended) A process for removing contaminants from a site, said contaminants including dissolved hydrocarbon products, said process comprising:
injecting gas as bubbles including ozone gas under conditions to break carbon-carbon bonds in the contaminants in the site with injecting further comprising:
alternating water injection with bubble production to provide an even dispersion of bubbles, with the bubbles having a bubble diameter of less than about 200 microns, pulling the contaminants into the bubbles and decomposing the contaminants in a reaction in the bubbles in the presence of water.
